

A close-up photograph of a person's face, focusing on their eyes. The face is partially obscured by a semi-transparent digital overlay consisting of a grid of small, glowing blue dots. The person's eyes are looking directly at the camera with a focused expression. The background is dark and out of focus.

# MEGA-Line racing technology GmbH - Environmental Guideline

# Environmental Guideline

---

## Preamble

MEGA-Line racing technology GmbH is committed to protecting the environment in all its business activities, and minimizing its impact on natural resources. Our goal is to actively contribute to a sustainable future through targeted measures in the areas of climate protection, resource efficiency, and biodiversity.

We expect the same commitment from all our suppliers.

# Structure

---

## 1. Environmental Goals and measures

- 1.1 Greenhouse Gas Emissions
- 1.2 Energy Efficiency
- 1.3 Renewable Energies
- 1.4 Decarbonization
- 1.5 Water Quality, Consumption, and Management
- 1.6 Air Quality
- 1.7 Responsible Management of Chemicals
- 1.8 Sustainable Management of Resources
- 1.9 Waste Prevention
- 1.10 Reutilization and Recycling
- 1.11 Animal Protection
- 1.12 Biodiversity, Land Utilization and Deforestation
- 1.13 Soil Quality
- 1.14 Noise Pollution

# Environmental Goals and Measures

---

## Greenhouse Gas Emissions

We are committed to continuously reduce our green house gas emissions to become climate neutral. In order to achieve this, we regularly asses our carbon footprint and implement low-emission manufacturing processes as well as transportation solutions.

## Energy Efficiency

Our facilities and processes are steadily being optimized to reduce energy consumption. We thereby focus on using energy-saving measures and modern technologies.

## Renewable Energies

Where possible, we source our energy requirements from renewable sources such as solar or wind power. We promote the expansion of renewable energy sources within our company and across our networks of business partners.

# Environmental Goals and Measures

---

## Decarbonization

In the long run, we aim for the complete decarbonization of our value chain. We achieve this by introducing sustainable materials and digitalizing our processes.

## Water Quality, Consumption, and Management

We minimize water consumption in our manufacturing processes and ensure that water resources are not negatively impacted. Effluent is treated according to the highest environmental standards.

## Air Quality

To reduce pollutant emissions, we rely on the most advanced filter technologies and low-emission processes. It is our goal to actively improve the air quality at our company sites and in their surrounding areas.

## Responsible Management of Chemicals

Chemicals are strictly used in accordance with legal requirements and ecological/environmental standards. We strive to reduce hazardous substances or to replace them with more environmentally-friendly alternatives.

# Environmental Goals and Measures

---

## **Sustainable Management of Resources**

We make sure to use natural resources responsibly and prefer materials that have a long lifespan or are recyclable.

## **Waste Prevention**

It is our goal to prevent waste as extensively as possible through precise material planning and optimized manufacturing processes.

## **Reutilization and Recycling**

Recycling is an integral part of our manufacturing strategy. We promote closed material cycles and rely on recycled materials.

## **Animal Protection**

Our business activities factor in the protection of animals and their habitats. We avoid the use of products that are tied to animal cruelty or the destruction of ecosystems.

# Environmental Goals and Measures

---

## **Biodiversity, Land Utilization, and Deforestation**

We are dedicated to preserving biodiversity by promoting sustainable land-use practices and supporting measures against deforestation.

## **Soil Quality**

We ensure that soil quality is not negatively impacted by our company operations. This includes the prevention of contamination and the promotion of soil protection measures.

## **Noise Pollution**

We rely on low-noise machines and technologies to minimize noise pollution and design our company sites accordingly.

# Conclusion

---

MEGA-Line racing technology GmbH regularly assesses its environmental goals and measures to incorporate new understanding and technological advancements. All employees are actively engaged in achieving these goals and minimizing the company's ecological footprint.

# Effectiveness of the Environmental Policy

---

By signing this document, the principles outlined herein regarding

✓ **Environmental Goals and Measures**

shall take effect.

No third-party claims can be derived from this statement.
